- PROFESSIONAL EXPERIENCE
- Junior Software Engineer | March 2024 – October 2024

Winzoom

 - Worked on building and improving backend features using Laravel and MySQL, helping the team deliver stable and scalable functionality
 - Created clean and user-friendly interfaces with React.js and Ant Design, making the user experience smoother and more engaging
 - Customized WordPress websites based on client specifications

Junior Full-Stack Developer | September 2023 – January 2024

AdsGlory

 - Helped build full-stack web apps using TypeScript, React.js, and Express.js, often from scratch or based on quick client feedback
 - Set up and worked with MongoDB databases to manage and display data efficiently in real-time
 - Used Playwright for testing key features, making sure everything worked before going live and reducing the number of bugs users faced

Full-Stack Developer Intern | March 2023 – May 2023

Training Edge Consulting

 - Built full-stack applications using React.js, Node.js, MongoDB
 - Collaborated in a remote team using GitHub and Postman
